Fur Harvesters AUCTION INC.

DECEMBER 17, 2005 SALE RESULTS
PRICES IN U.S. DOLLARS

FHA's December 17, 2005 auction was very successful. Our attendance of buyers exceeded last December's. Beaver, muskrat and mink realized strong increases of at least 20% over last year's levels. Otter remains firm to last year's levels while fisher continues to rise. The amount of interest for most all wild fur species has been remarkable. Items such as fisher, lynx, bobcat, mink, beaver and muskrat are in very high demand. The buying community is pressing our firm very hard for details on what quantities will be available for our February 2006 auction. Marten is expected to see the highest price increases of any wild item this year. As FHA's February 2005 auction witnessed the highest averages on many species, our reputation for handling the finest northern goods from several premier jurisdictions has created an exclusive marketing edge in our shippers favour. The world's buying power looks to the company now when pressed to fill orders on select goods such as sable, beaver, fisher, lynx, fox and wild mink. We are very optimistic that with the conclusion of our December 2005 auction and with North Bay once again setting the market first, this trend of strong prices will only continue more aggressively as the season goes on.

Eastern Part Lot Details - Top Price Select Lot $47.00 SECTION I $27.17
